

Hydraulic Muti-flap Grab

◆ **Basic Parameter:**

Volume: 0.5m³~20m³

Self weight: 1.5T~11T

Motor power: 11kw~45kw

Operating pressure: 180, 200 bar

Close time: 10s~28s

This series grab is suitable for loading and unloading of scrap iron and steel bulk materials and garbage in various harsh environments, and is widely used in port, railway, metallurgy, mining, construction and other industries.

The grab jaw flap can be closed according to the shape and size of the material, which is conducive to the grabbing of large materials. The number of jaw flap can be designed according to the characteristics of grabbing materials and the needs of users.
