

## LB Type Explosion Proof Electric Girder Crane

### ◆ *Basic Parameter:*

Capacity: 1T-20T

Lift height:6m-24m

Lifting mechanism:HB/BCD/

BMD electric hoist(EX)

Span: 7.5m-28.5m

Working class:A3

Power source: 380V 50hz 3P

or customized

Explosion proof grade:

Exd II BT4/Exd II CT4

The explosion proof crane is an overhead crane with an explosion-proof electric hoist. It has mature and reliable technology, simple structure, small appearance, light weight, installation, use. The working environment temperature is  $-20\sim 40^{\circ}\text{C}$ . The relative humidity should not exceed 50% when working indoors at  $40^{\circ}\text{C}$ , and the relative humidity can be as high as 100% when working outdoors at  $25^{\circ}\text{C}$ . The altitude of the installation site does not exceed 2000m. It is suitable for the maintenance and loading and unloading of mechanical workshops, warehouses, stock yards, and hydropower stations in light work systems.
