

## Lifting Electromagnet for Turning and Side Hung

The product is suitable for turning slab caster for the purpose of checking & surface finishing its up and down surface and for lifting and transporting thick plate and tube caster as well, it can turn slab caster around 180° degree when being lift by the crane equipped.

The product is suitable for turning slab caster for the purpose of checking & surface finishing its up and down surface and for lifting and transporting thick plate and tube caster as well, it can turn slab caster around 180° degree when being lift by the crane equipped with guide column.

**Main technical data for high temperature type**  
below 700°C, rated voltage DC-220V, duty cycle TD-60%
