

Metallurgical Electric Hoist

Metallurgical electric hoist mainly used for lifting molten metal. Work environment temperature $-20\sim 60^{\circ}\text{C}$, It is often used in high-temperature working environment such as smelter. With double brakes, double limits, thermal baffle felt etc. many kinds of protection functions.

◆ **Basic Parameter:**

Lifting weight: 0.2T-10T

Hoisting high: 9m-20m

Hoisting speed: 8/2, 7/
1.75 m/min

Travel speed: 20 m/min

Power supply: 380V 50hz 3P
or customized
