

QC Type Electromagnet Bridge Crane

◆ Basic Parameter:

Capacity: 5T-16T

Lift Height: 16m

Span: 10.5m-31.5m

Working Class:A6

Power source: 380V 50hz 3P

or customized

Electromagnet Diameter:776-1180mm

The crane is mainly equipped with electromagnet, When the current is turned on, the electromagnet will firmly attract the steel objects and lift them to the designated place. Cut off the current, the magnetism disappeared, and the steel object was put down.The crane is suitable for scrap recycling plants and steel mills.
