

## Spring Cable Reel

### ◆ *Basic Parameter:*

Length: 10-100m

Cable: 3\*0.75mm<sup>2</sup>

Rating: 380V

Material: Standard Copper

Rated Voltage: Rated Voltage

JT series cable reel is a mechanical device that introduces the internationally-used wind-up type cable reel technology, uses a volute spring as the power, and uses the energy of the spring to automatically rewind the cable. It is suitable for various places that require mobile cable power supply, such as lifting electromagnets, electric flatbed carts, various cranes, hydraulic grabs, etc.

Applicable cables: power cables with a cross-sectional area of less than 35 mm<sup>2</sup> and signal cables with a core area of less than 24 mm<sup>2</sup>.

Winding length: not exceeding 30m.
