

European Explosion Proof Hoist

◆ *Basic Parameter:*

Load capacity: 1t-20t

Lifting height: 3m~30m or customized

Power supply :380V/50HZ/3P or customized

Applications:

Explosion-proof hoists are widely used in important industries such as ports, electricity, shipbuilding, petrochemicals, railways, industrial control, highways, large-scale transportation, pipeline laying, shaft management and protection, maritime rescue, marine engineering, airport construction, bridges, aviation, venues, and mechanical equipment for infrastructure projects. The explosion-proof grades of explosion-proof electric hoists are d II BT4 and d II CT4, respectively, and the structure is reasonable. The leaking parts of explosion-proof wire rope electric hoists are made of special spark-free materials, and the explosion-proof performance is safe
