

European Double Beam Wire Rope Hoist

◆ *Basic Parameter:*

Load capacity:5-80t

Lifting height:3-100m

Working level:M4, M5, M6

Power supply :380V/50HZ/3P or customized

Working temperature:-20℃+55℃

Applications:

European double-beam wire rope hoist is a material handling equipment developed with advanced design technology according to FEM standards and other regulations. The new series of wire rope electric hoist trolleys are environmentally friendly, energy-saving and economical, and are among the best in similar products. The lifting capacity of European wire rope electric hoists is 1 to 80 tons.

Compact structure, light weight, small wheel pressure, maximum utilization of space, high comprehensive cost performance.

Advanced technology has promoted the limit size of the product, and the structure is more compact under the premise of ensuring high efficiency.
